- Acoustical flooring underlayment
- "Just right" thickness for comfort and stability
- Seam overlap protection with peel and stick adhesive strip eliminating the need to tape seams when installing over concrete
- Closed cell construction for better sound control
- Bonded polyethylene layer provides a moisture retardant barrier
- For use over concrete or wood substrates on all grade levels
- Made in the USA
Installation Instruction for Shaw Bravo acoustic underlayment.

Before beginning any flooring installation please read the Shaw flooring installation instructions very carefully.

**Step 1.** Make sure the floor is cleaned, vacuumed and dry. Check for levelness and moisture as per your Shaw floor installation instructions.

**Step 2.** Place the first row of Bravo underlayment against the wall, cut to fit length with the overlapping lip toward the center of the room.

**Step 3.** Repeat the process by place the second row of Bravo with the tape strip directly over the overlapping lip of the first row.

**Step 4.** Remove the tape’s release liner to expose the adhesive and securely adhere the two rows together. Make sure the seams are butted tight. Now complete the underlayment installation.

**Step 5.** Install the flooring perpendicular to the Bravo underlayment.

Enjoy your new Shaw floor!
